Subject: Re: rocks for 160 & 80?

Best for AM is 3880 and 3885 kHz

On 160m I am not sure.

Subject: FS-80&40 mtr. xmitter KIT

Hi All;

I have a Brand new, never opened 80 and 40 metter CW transmitter in KIT form. Made by an electronics firm here on Long Island, I suspect in the 60's. The kit also requires you to punch or drill the chassis and front panel with a paper templete(supplied), wind the plug in coil on a supplied form, etc. This is a complete TUBE XMITTER in KIT FORM. Price is \$125- shipped CONUS. Thanks es 73.....RICH

From: Sandy W5TVW <ebjr@worldnet.att.net>
Subject: Info Needed

Thanks to Nick W5FUA for data on the Solar model CE Capacitor
"Exam-eter". Want to try and bring one back from the dead!
I STILL need a copy of the information on the Model CF "Exam-eter".
(The CE is close, but there is some differences!)
Anybody out there have a book they can copy on the "CF"?

73,
E. V. Sandy Blaize, W5TVW
